

Print "...continued" on Next Page

Description:

How do I print the word '...continued' if a group prints over multiple pages?

Solution:

1. Make sure the group header is repeating on each page by turning on 'Repeat Group Header on Each Page'

- a) From the DESIGN screen, right click the Group Header section.
- b) Choose 'Change Group'
- c) Go to the 'Options' tab
- d) Turn on 'Repeat Group Header on Each Page'

2. Create a formula called 'Continued'.

If inrepeatedgroupheader
Then '...continued'

3. Place the formula in the Group Header that is repeating on each new page.

4. Format the formula as desired. One example of formatting could be:

- a) Place the group name into a text object, add a few spaces, then insert the continued formula.
- b) Highlight only the continued formula, choose a smaller font than the group name and italicize it. The output will look as follows when the group spans a page:

My Group Name *...continued*
